Lab's Structure

- Feedback on Assignment 1
- Walkthrough : Regression
- Pause @17:00
- Presentation of Assignment 2
- Q & A

0

Menti

Where are you in the progress of Assignment 1?

13/13

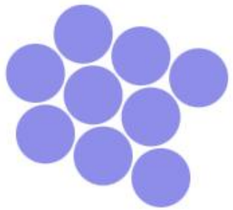

How would you rate your experience with the Assignment 1?

1 I need help: It was hard to follow and I need more guidance

4 Okay: Some sections were confusing

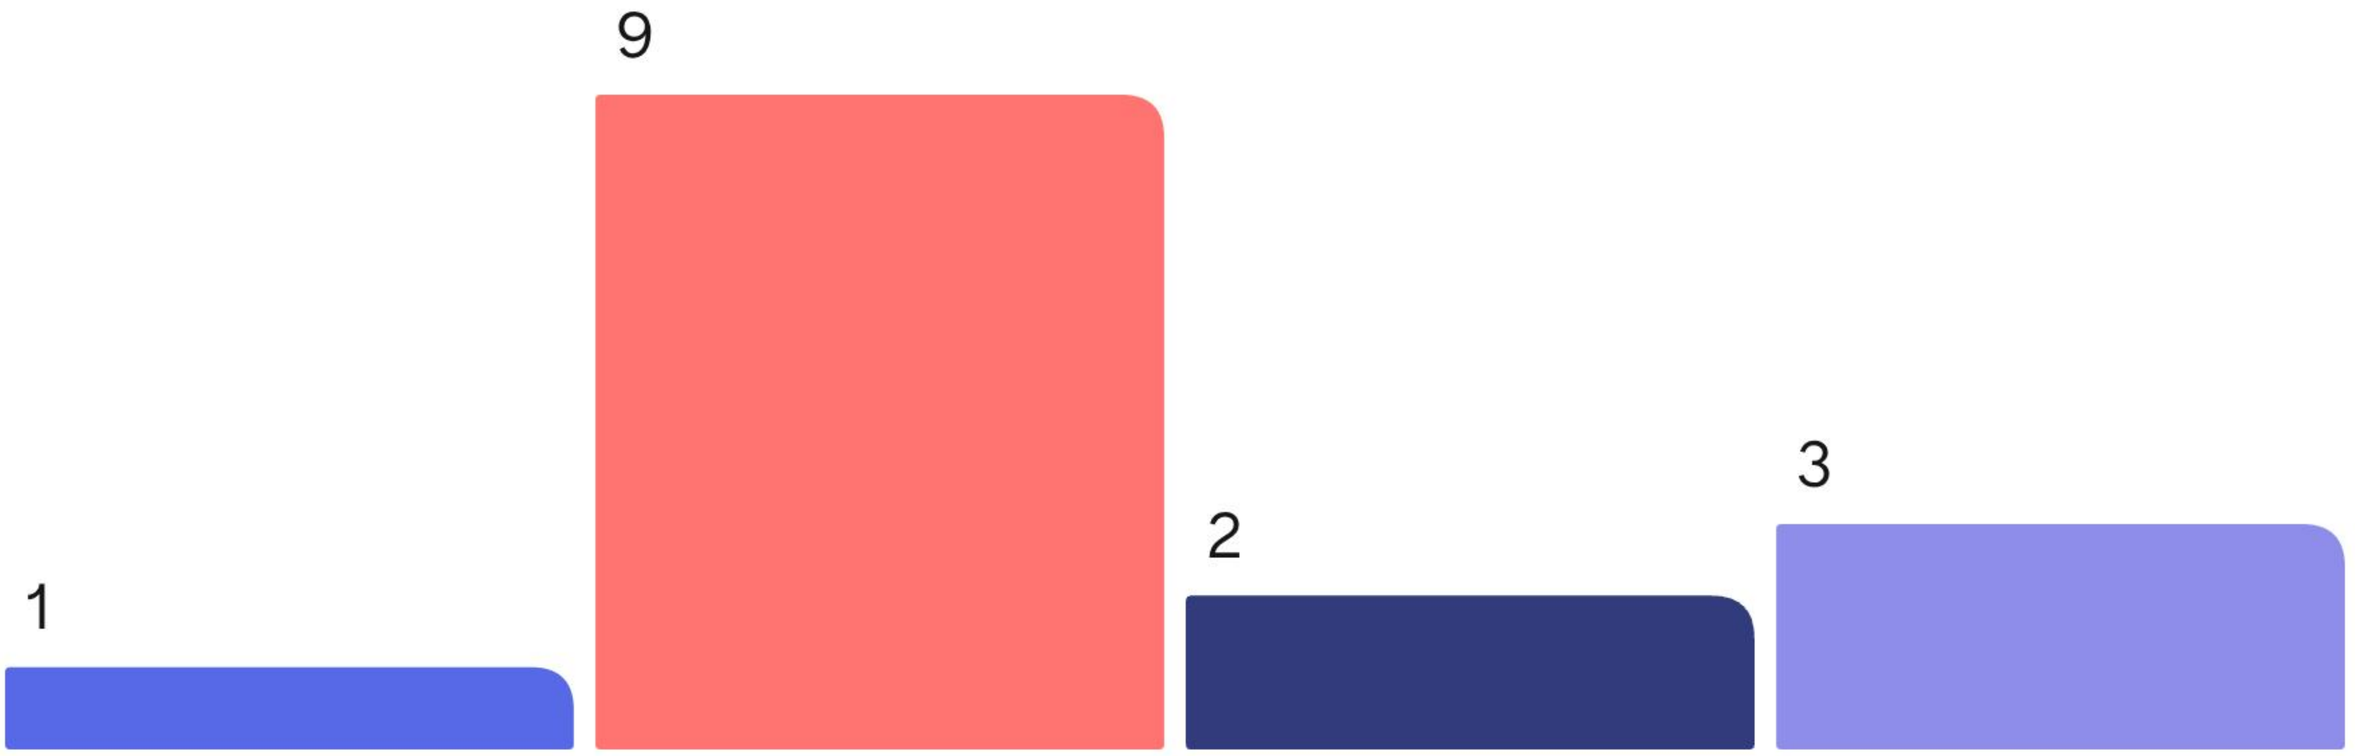

9 Good: Mostly clear, but a few tricky parts

1 Excellent: Everything was clear and easy to follow

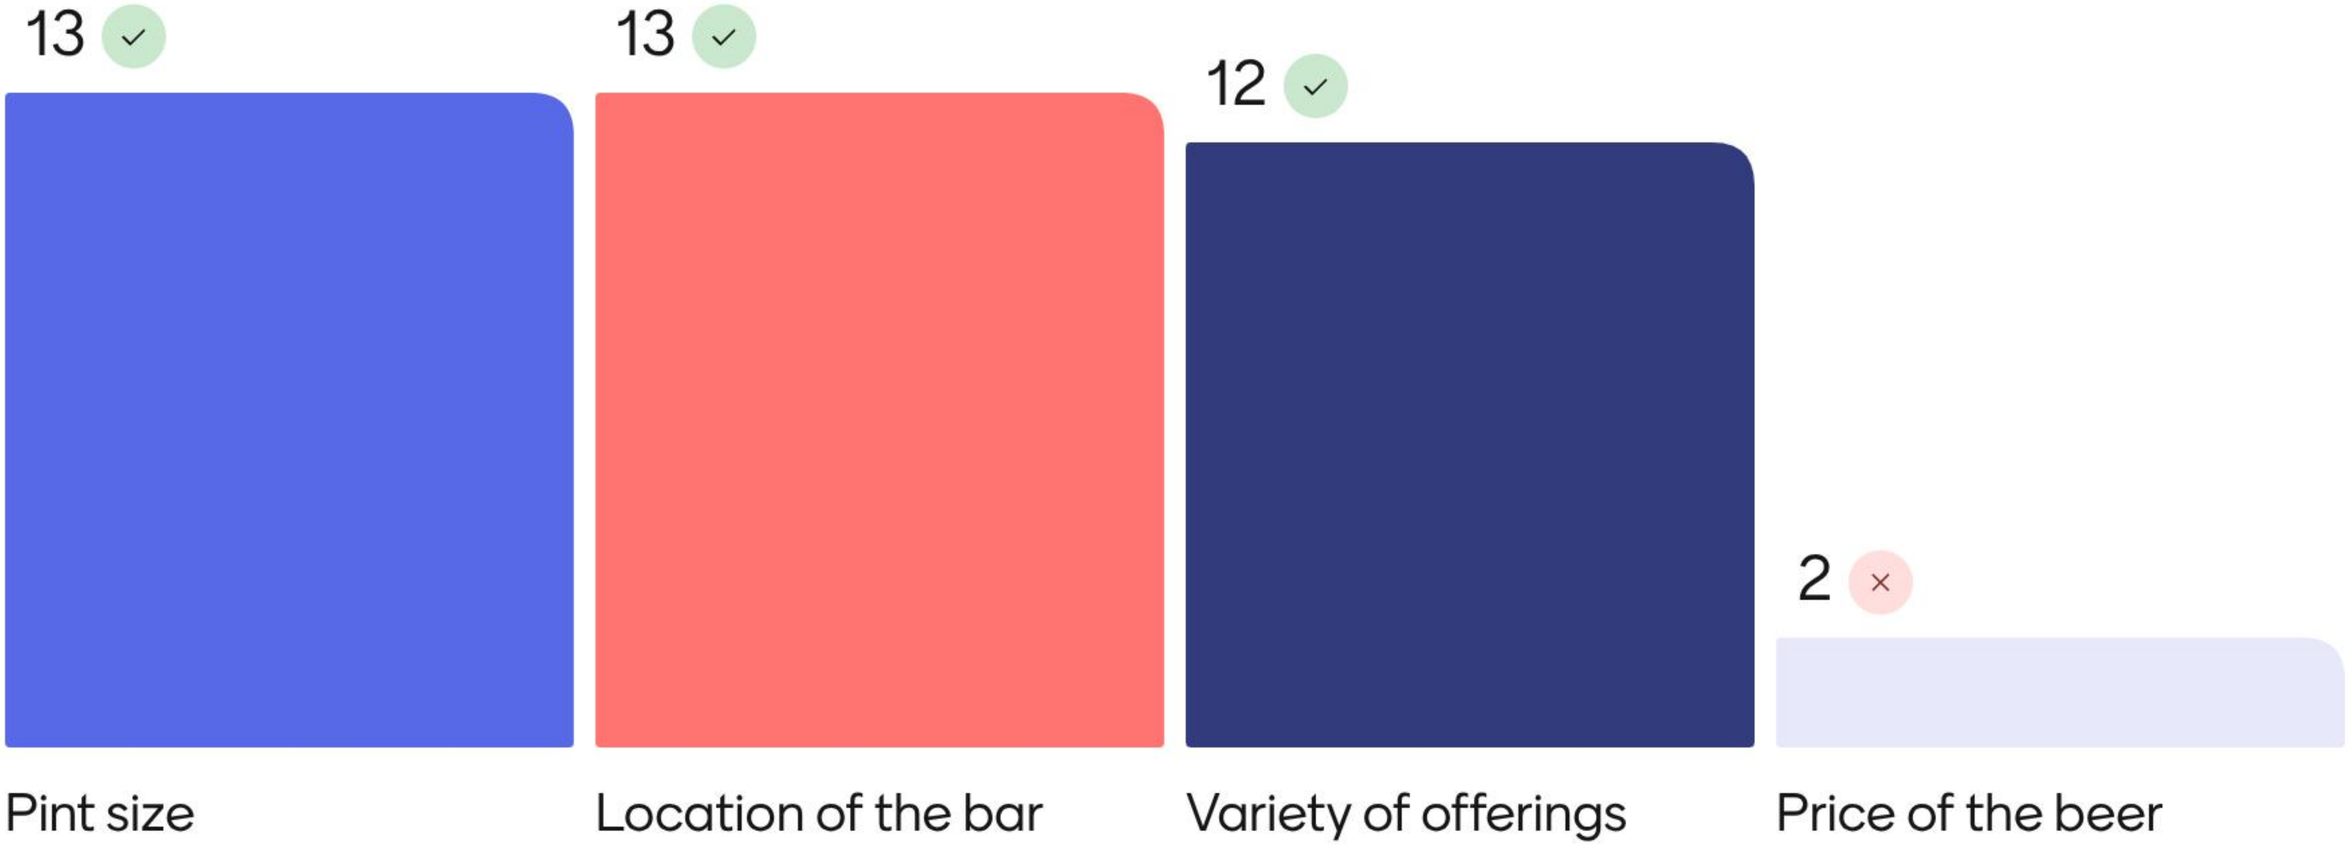

Menti

Did you use any generative AI for assignment 1?

Menti

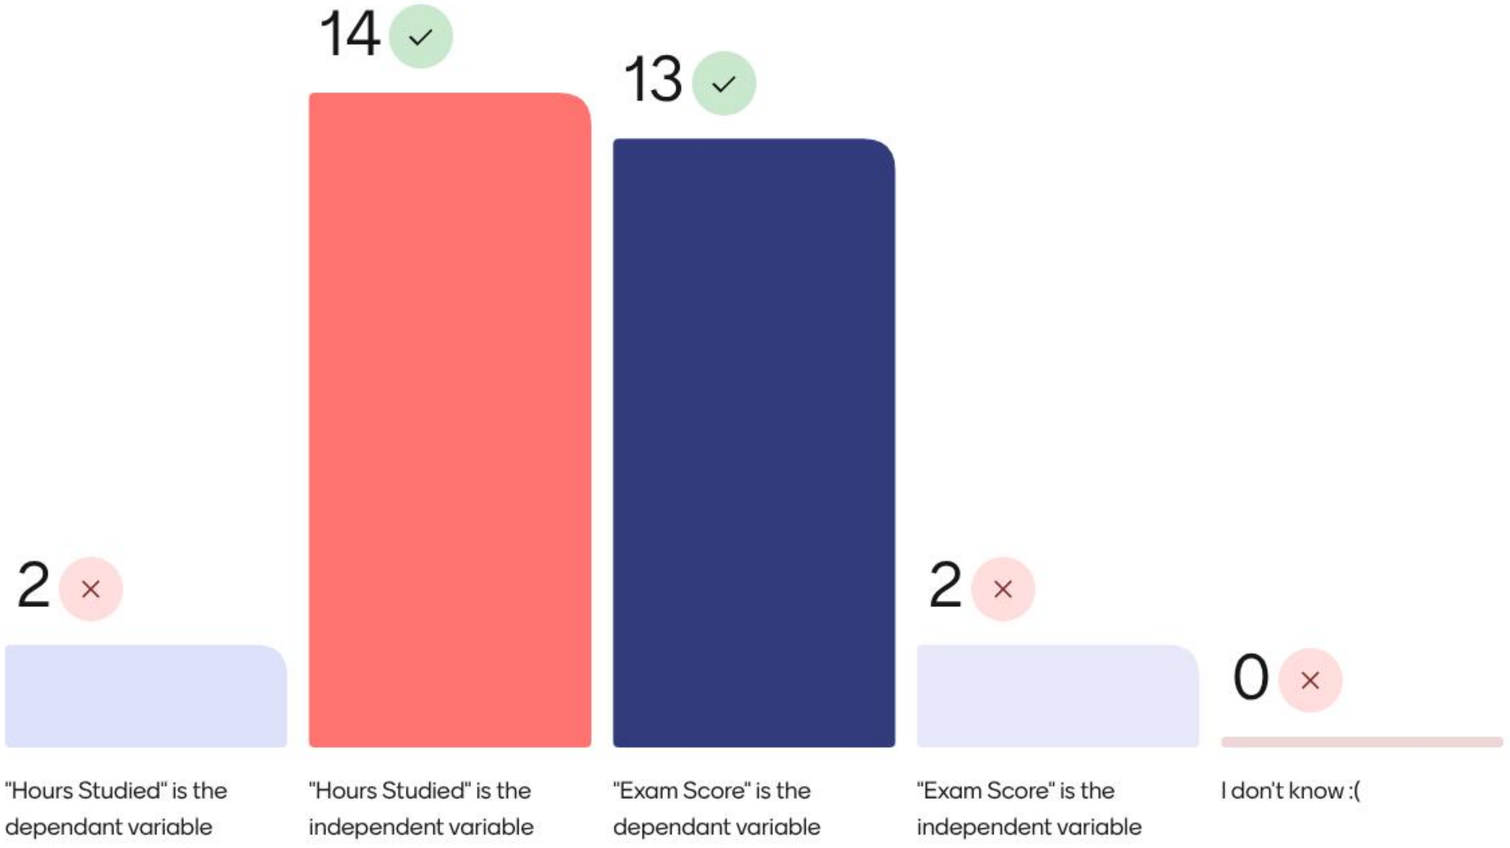

We try to predict the price of beer based on the location of a bar, the variety of offerings and pint size. Select the independent variable(s)

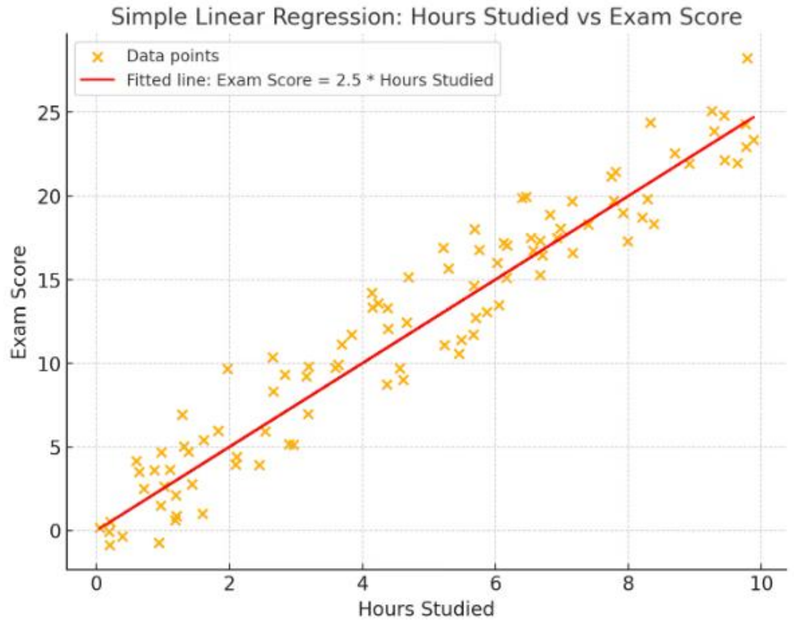

15/15

Menti

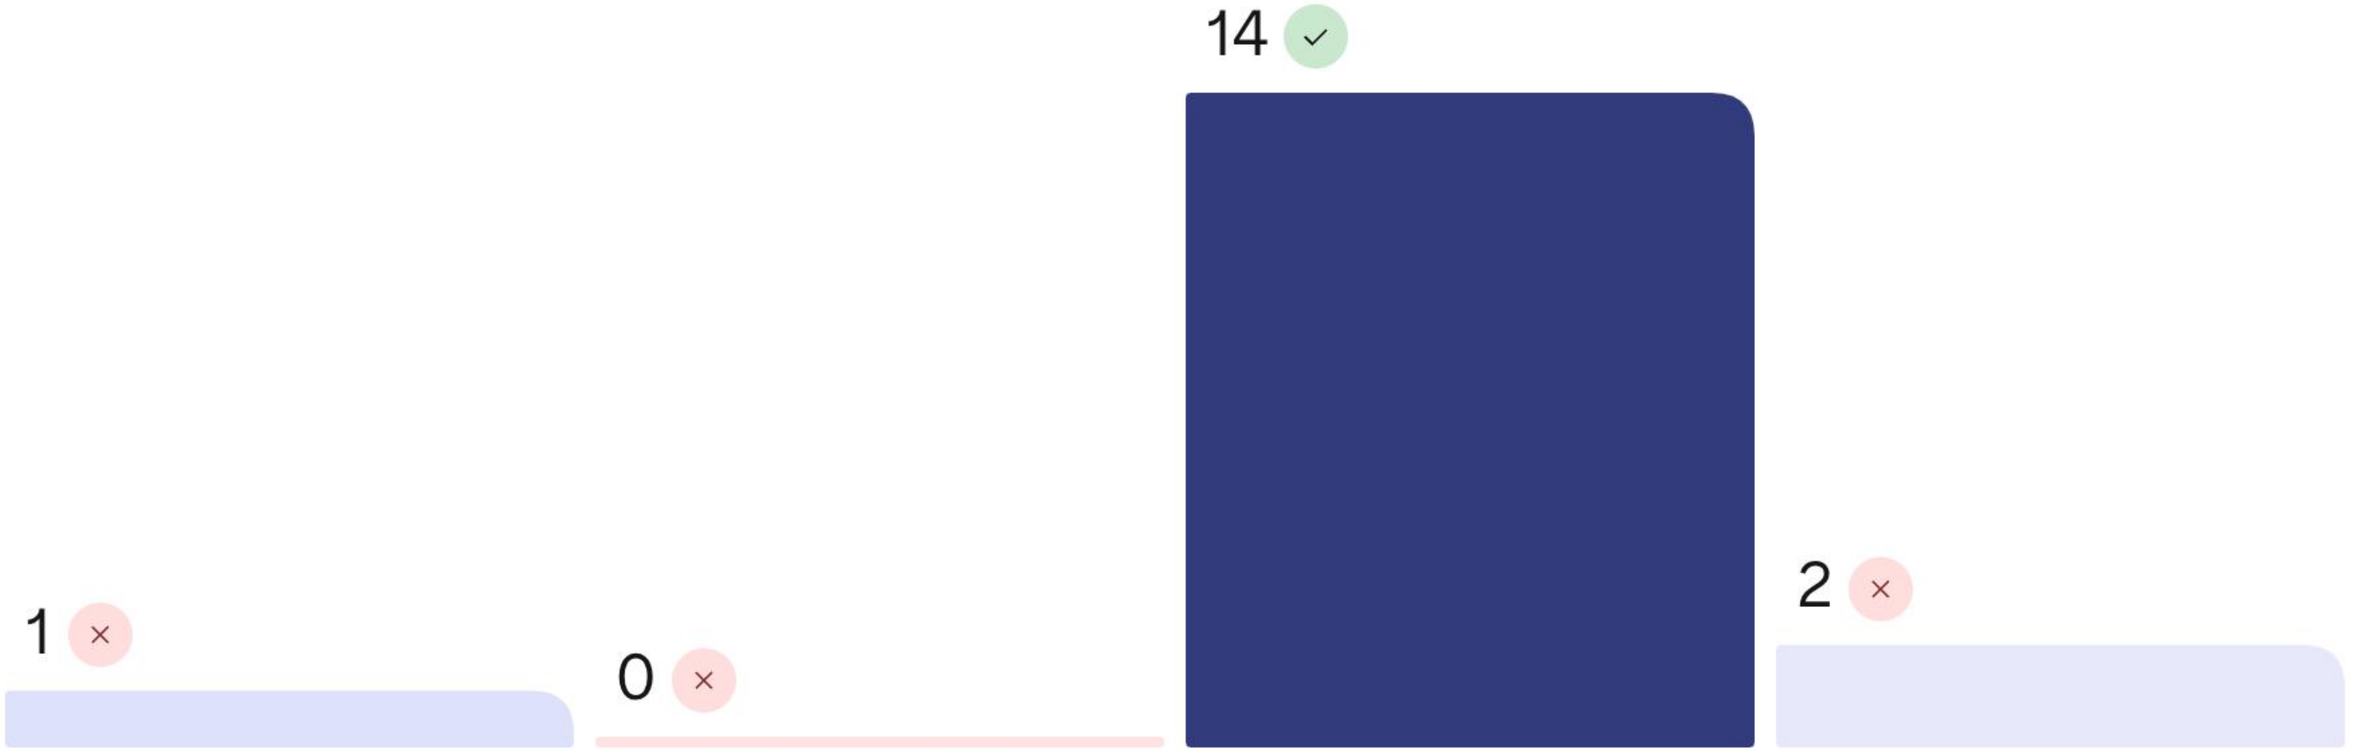

Independent or Dependent : In this graph, what answer(s) are true ?

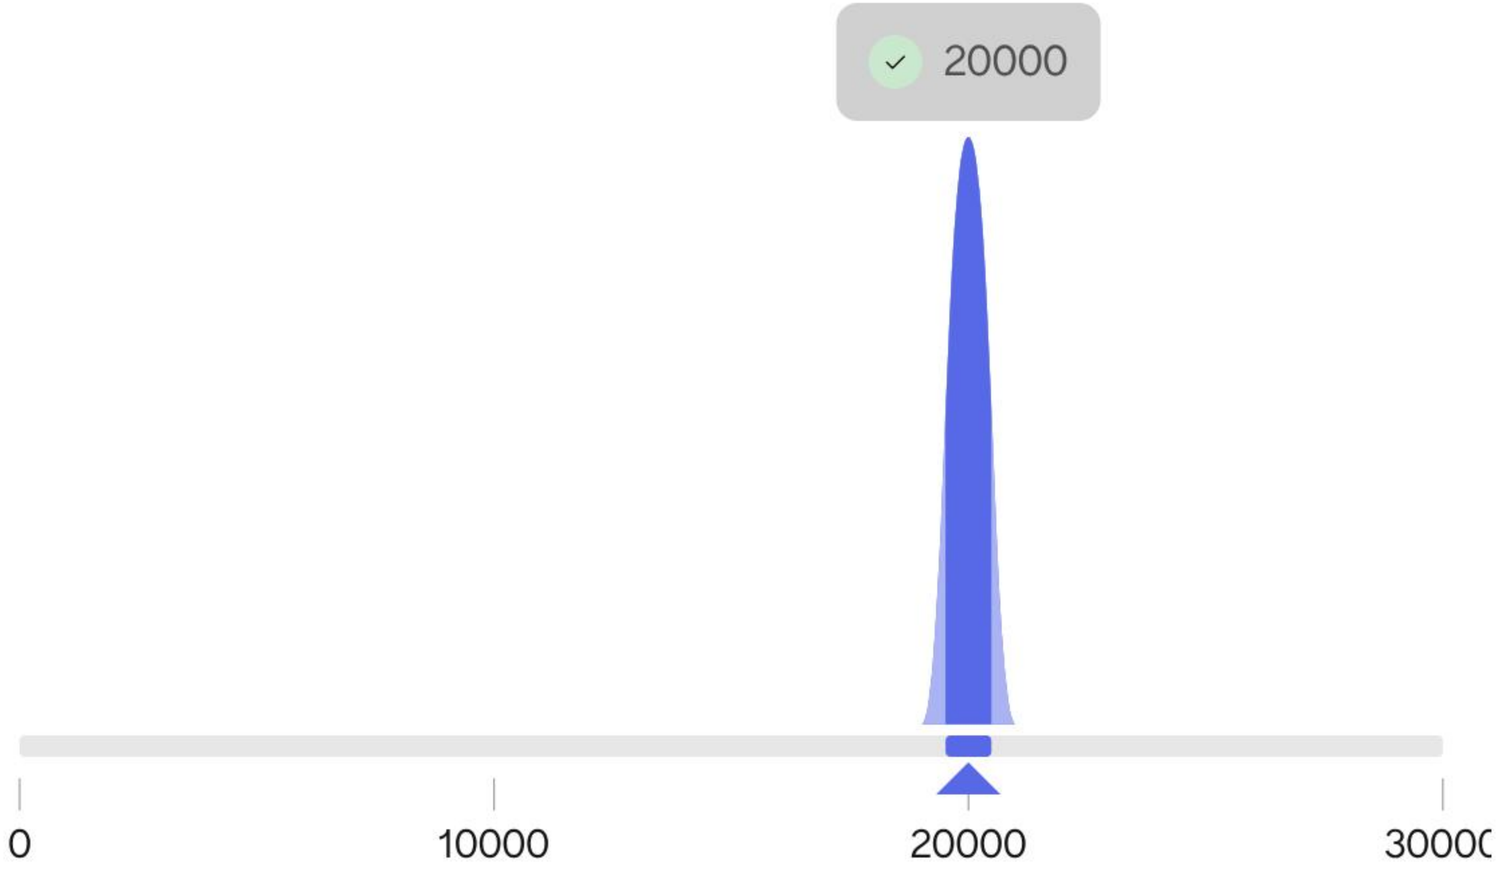

16/16

Why do we split the data into training (e.g., 80%) and testing (e.g., 20%) sets when training a model like linear regression?

17/17

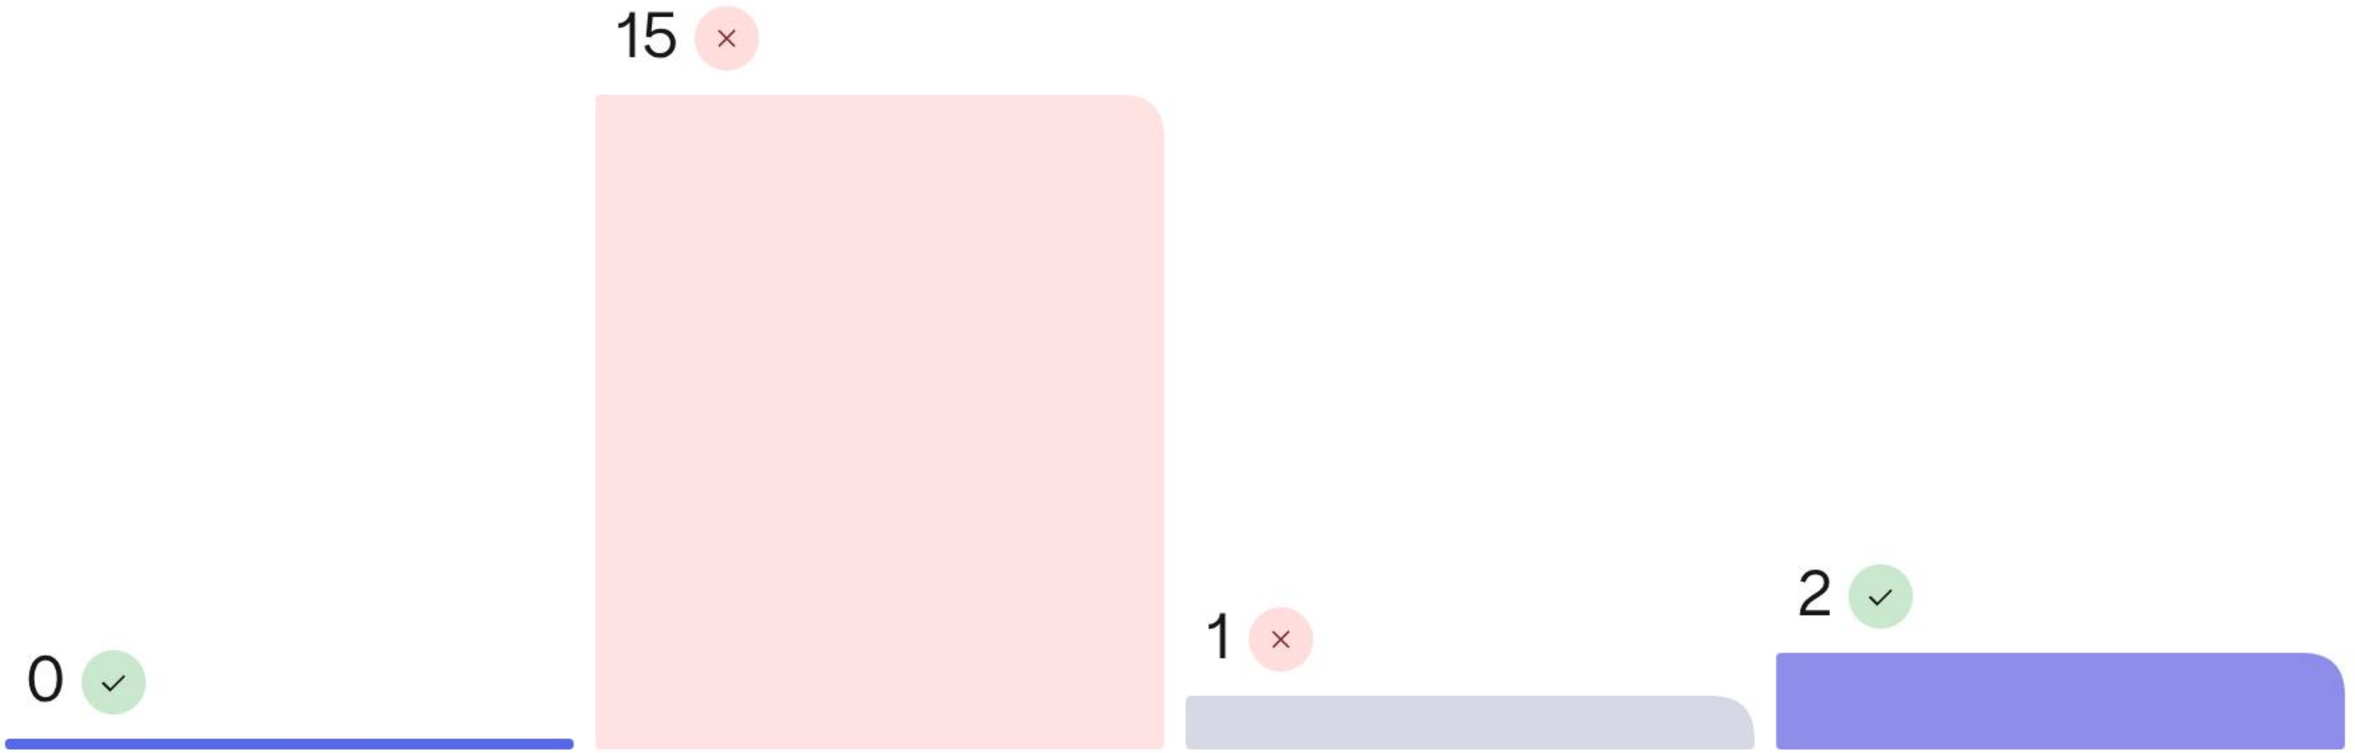

Prediction : Given 5 years of experience, what would the model predict as the salary?

Menti

Why do we scale the data before training a model? (e.g. MinMaxScaler)

18/18

Menti

Important informations

- Only the **last attempt **count in the moodle quiz
- Don't forget to **submit you code** (Code Q1)
- Don't forget to save a copy of your Notebook in your Drive (or locally)

Menti

Label encoding

Changes labels to a specific number

0

Menti

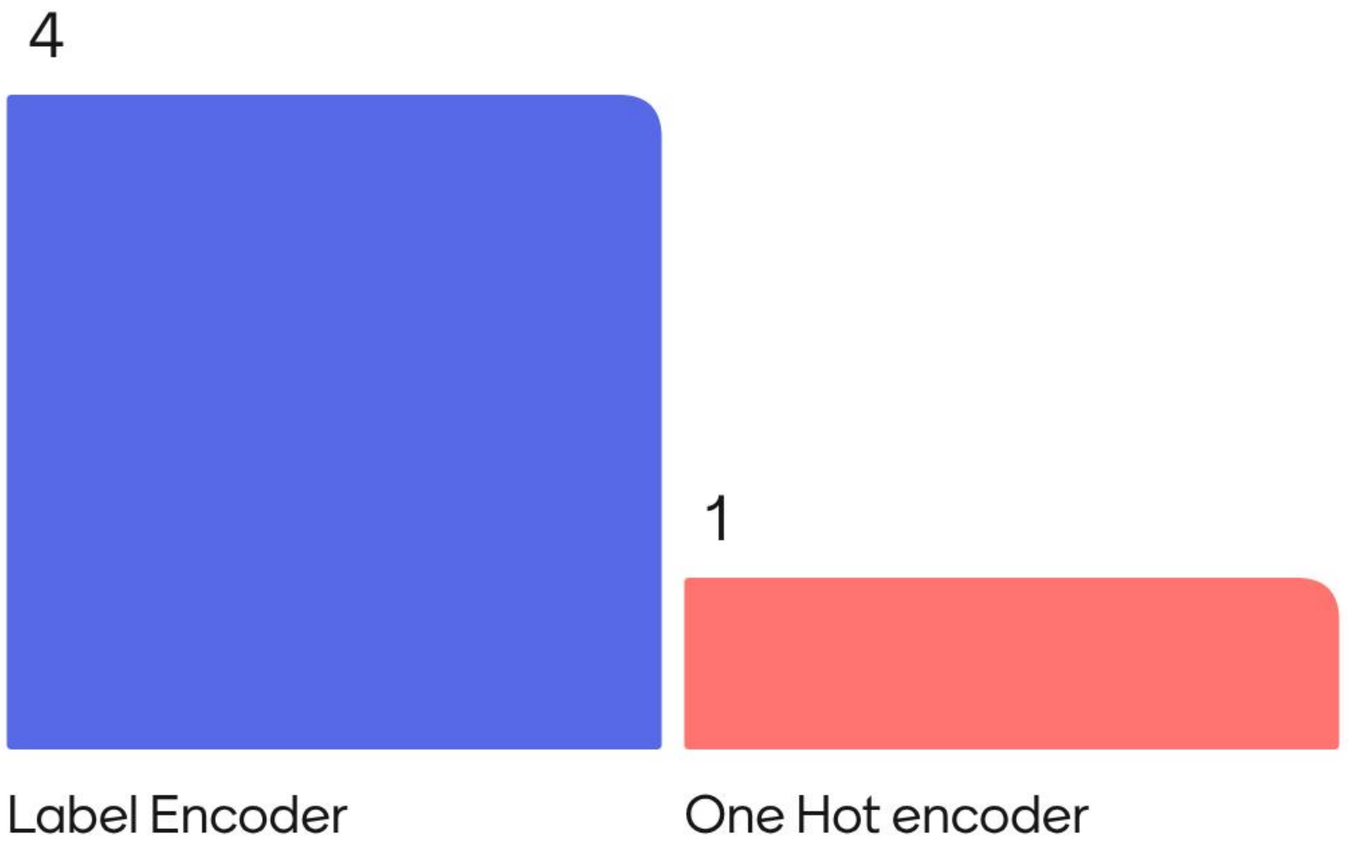

One hot encoding:

Makes a new column for each label

0

Menti

Which would better apply for a rating system (experience was very bad, bad, average, good, very good)

Menti

Which would better apply for a locations label (i.e. where people live)
