Did you see the announcement on teams?

13/13

Where are you in the progress of Assignment 3?

14/14

How would you rate your experience with the Assignment 3?

0 I need help: It was hard to follow and I need more guidance

0 Challenging: I struggled with multiple sections

0 Okay: Some sections were confusing

0 Good: Mostly clear, but a few tricky parts

0 Excellent: Everything was clear and easy to follow

Find the False Positive (FP) and False Negative (FN).

Menti

Which statement(s) are true if we use Manhattan distance and k = 3

8 ✓

New point is part of class B

4 ×

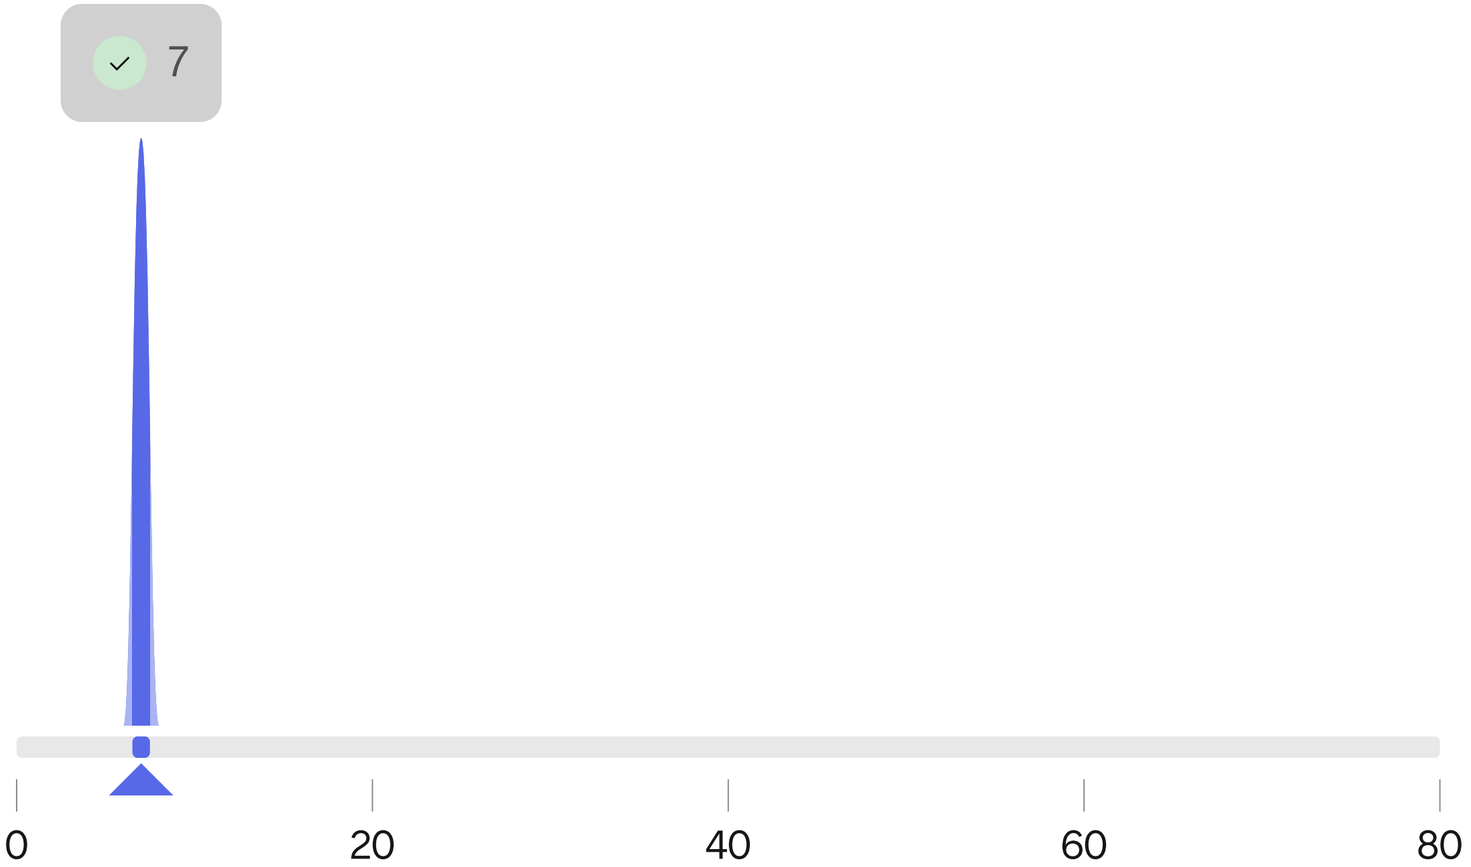

New point is part of class A

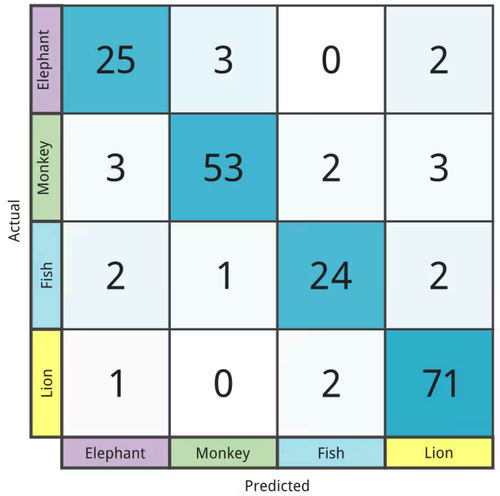

1 ×

We can't say with certitude

13/13

How many FP are there for lion ? (In yellow)

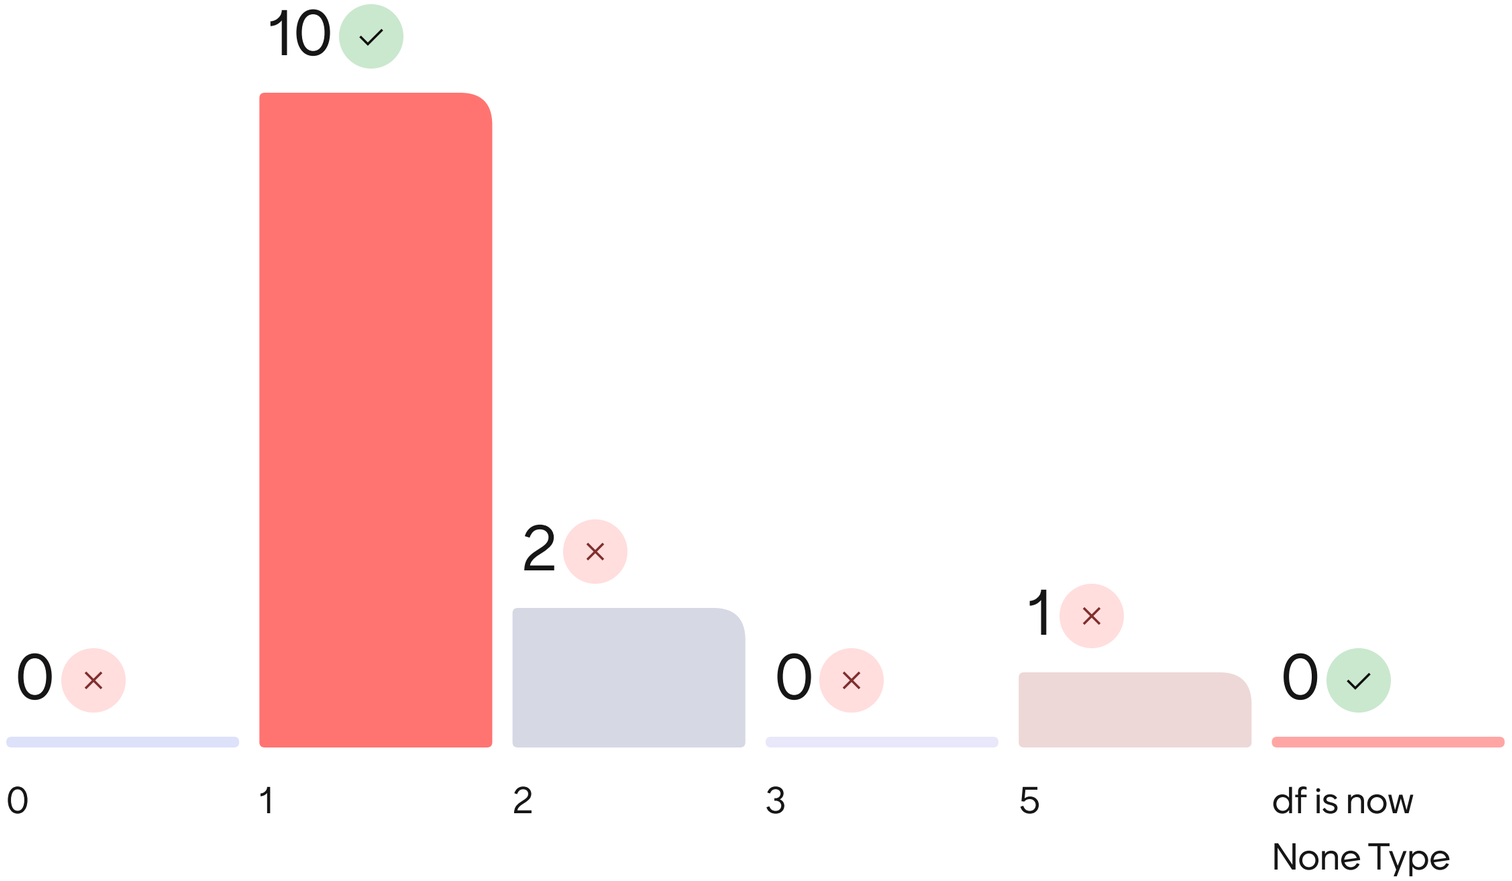

11/11

Menti

How many rows will remain after running df.dropna()

	Movie title	Release year	Category	Rating
0	The Animatrix	2003.0	NaN	4.6
1	NaN	NaN	NaN	NaN
2	Sissi – Die junge Kaiserin	1956.0	Romance	4.9
3	Titanic	1997.0	Drama	NaN
4	The Lion King	NaN	Animation	4.3
5	NaN	NaN	NaN	NaN
6	NaN	2001.0	Comedy	2.4

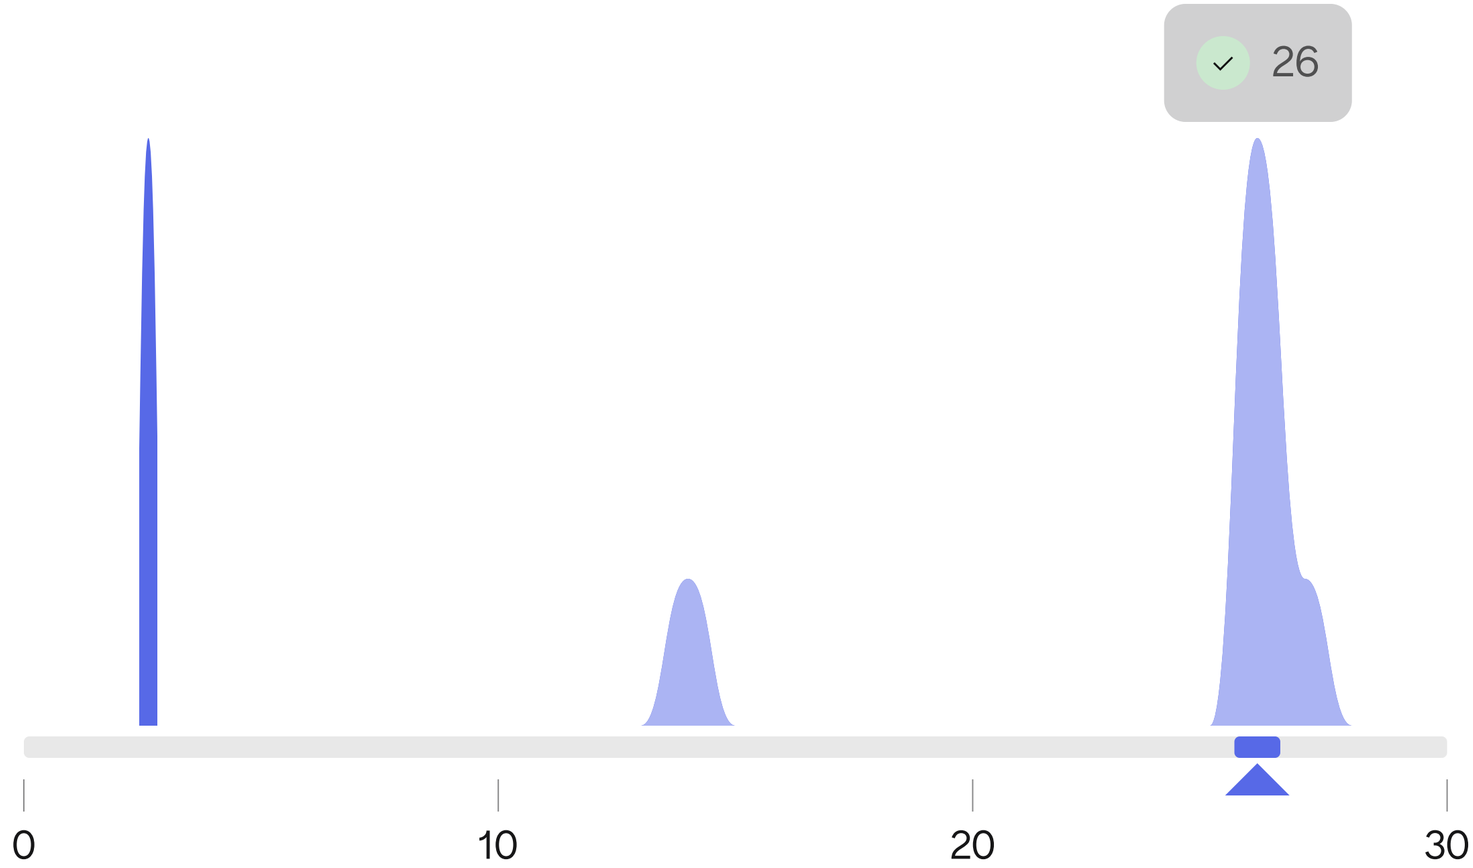

13/13

Menti

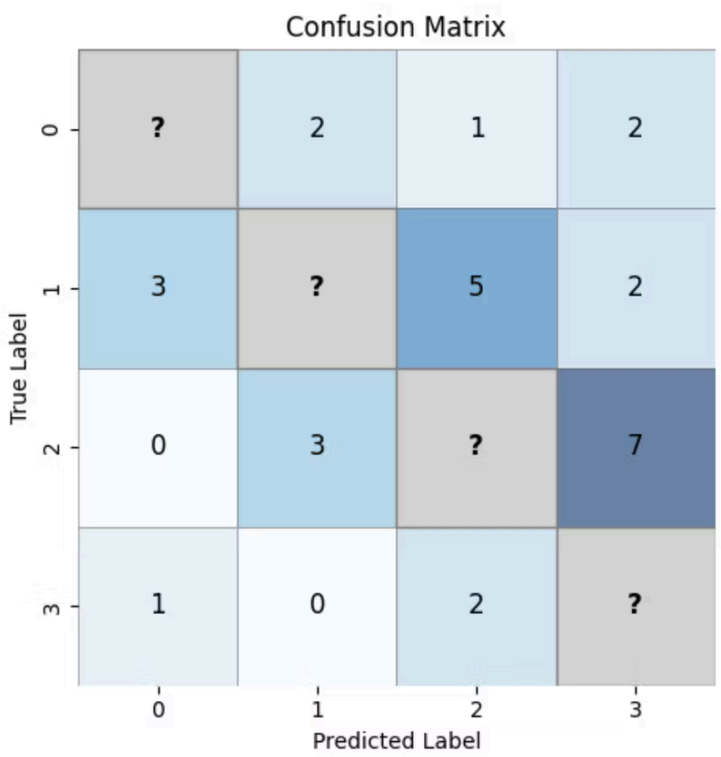

Knowing that the Micro precision of the classifier is 0.8, and that the recall for the "Democrats" class is 0.88, what is the value of Y?

	(Actual) Democrats	(Actual) Republicans
(Predicted) Democrats	X	9
(Predicted) Republicans	3	Y

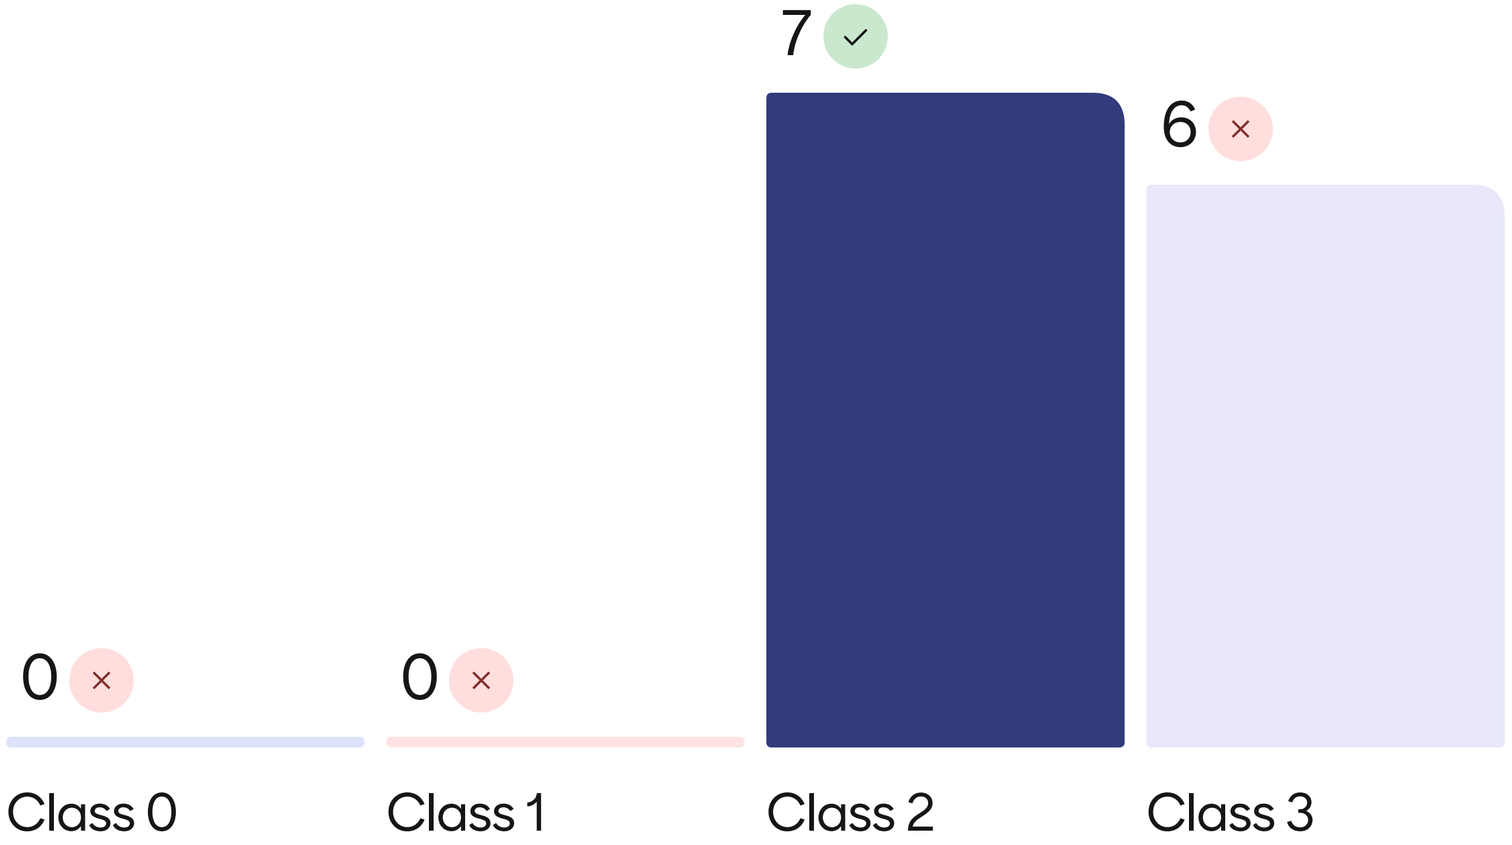

6/6

Menti

	Precision	Recall	F1-score
Class 0	0.93	0.91	0.92
Class 1	0.90	0.82	0.86
Class 2	0.83	0.80	0.82
Class 3	0.81	0.94	0.87

Which is the class with the lowest number of true positives?

13/13

What is the main purpose of using cross-validation in machine learning?

13/13

Menti

Consider a linear regression, what is the MAE of the following predictions.

True Value / Valeur Réelle	Predicted Value / Valeur Prédite
10	11
15	14
20	20
25	24
30	28

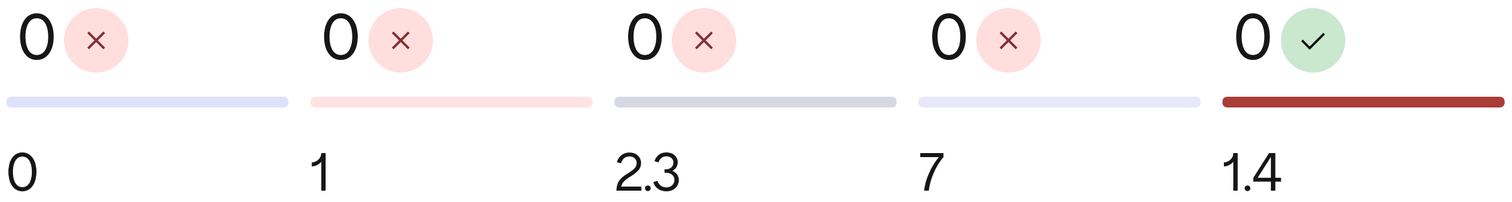

0

Menti

Consider a linear regression, what is the MSE of the following predictions.

True Value / Valeur Réelle	Predicted Value / Valeur Prédite
10	11
15	14
20	20
25	24
30	28

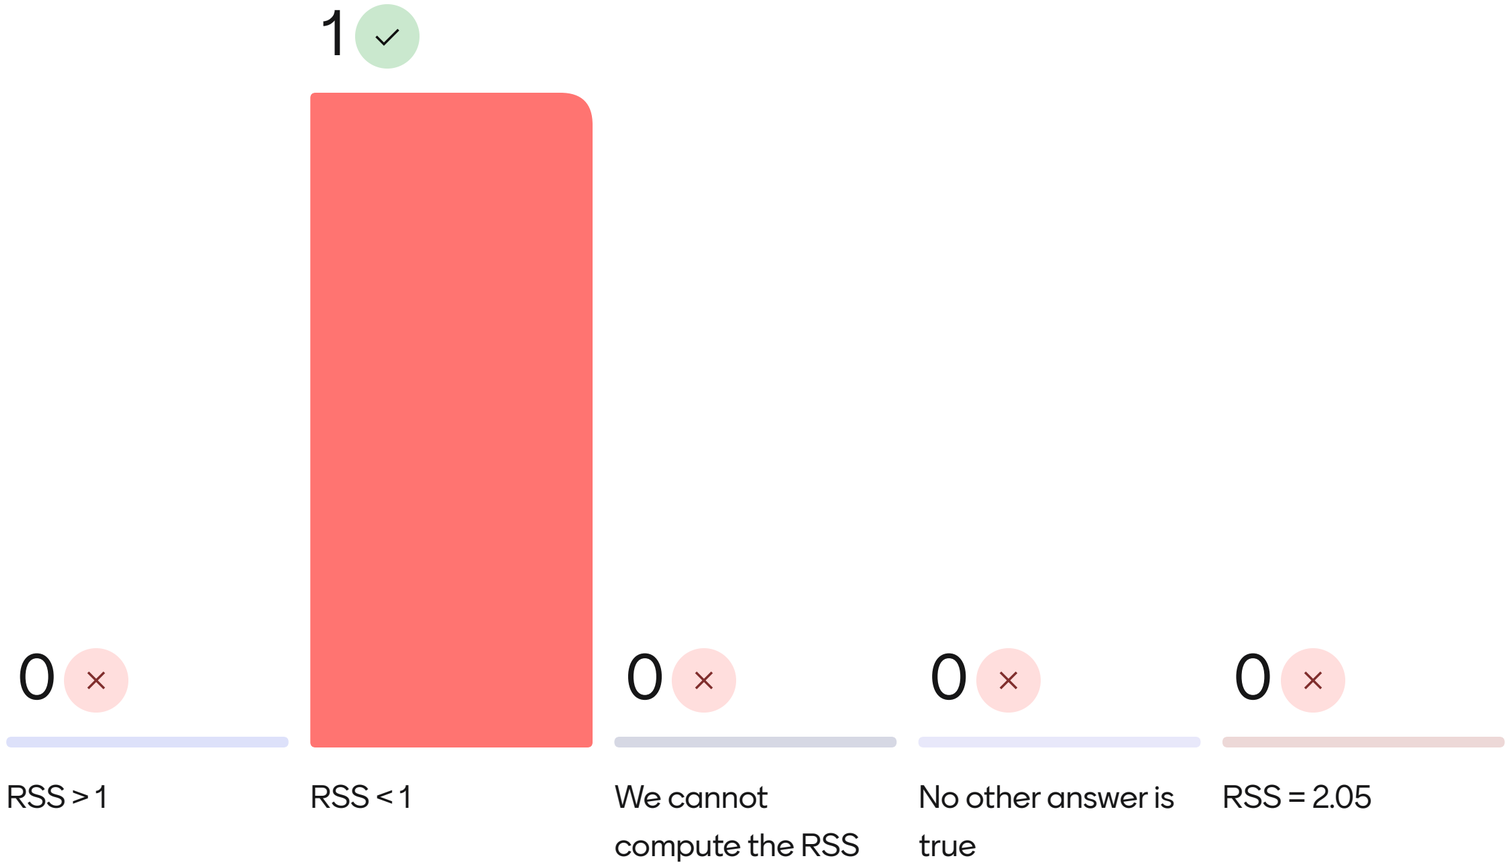

0

Menti

True Value / Valeur Réelle	Predicted Value / Valeur Prédite
10	11
15	14
20	20
25	24
30	28

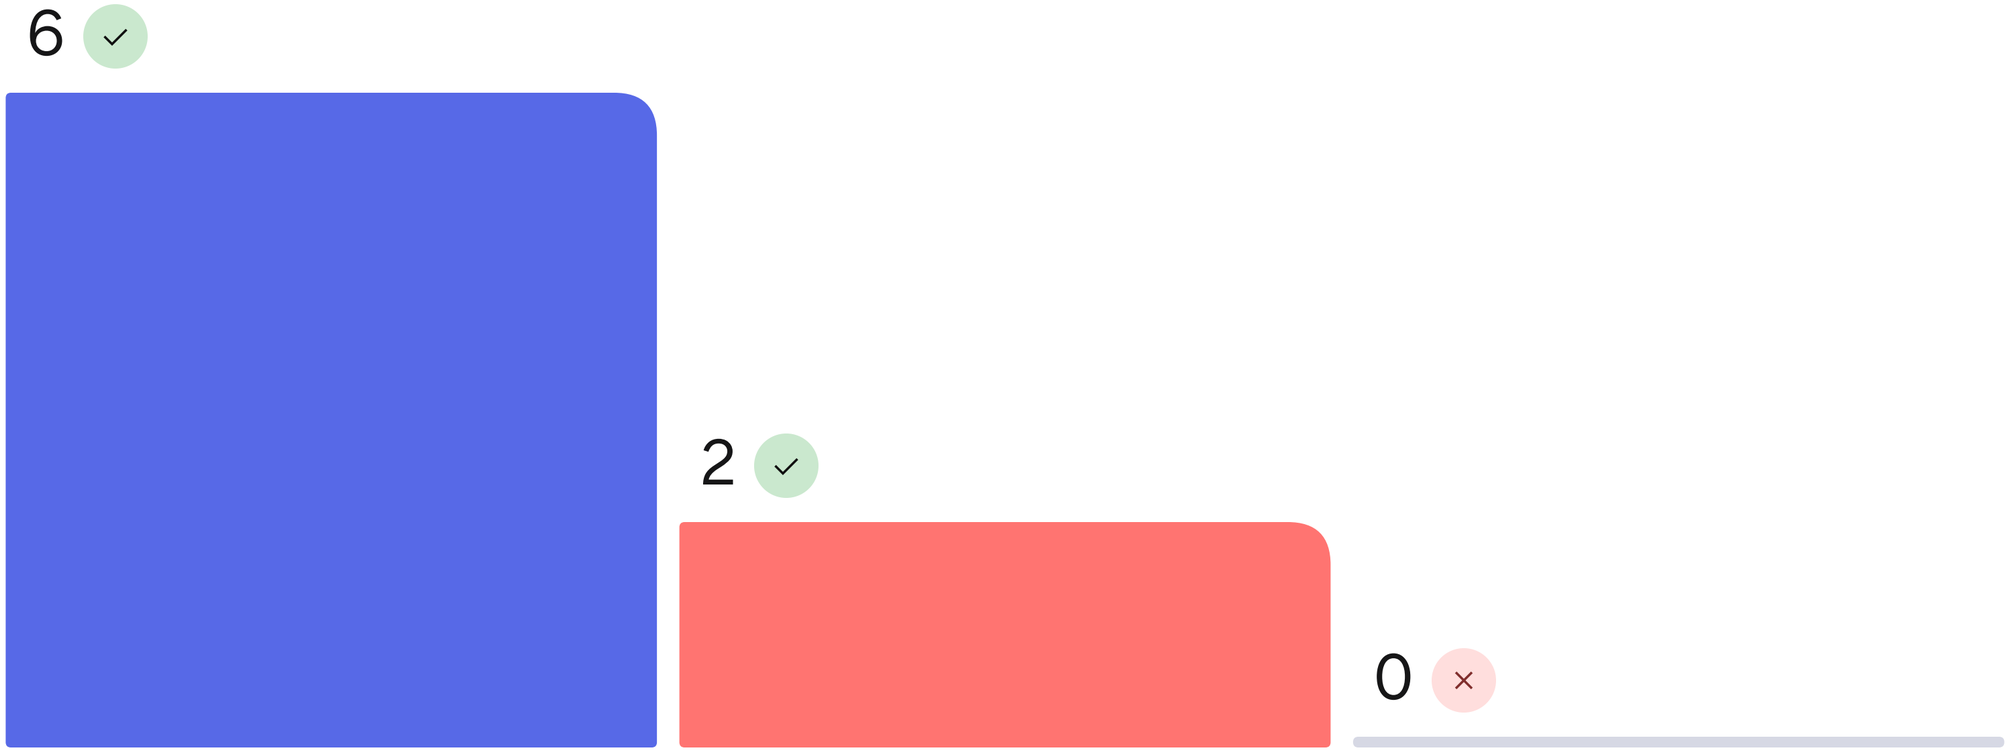

Consider a linear regression, what is TRUE about the RSS of the following predictions.

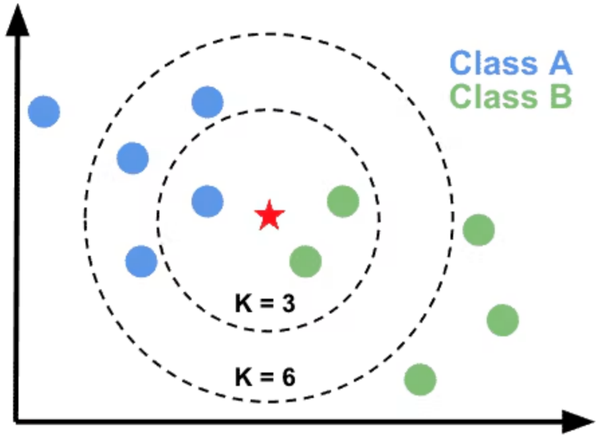

1/1

Menti

How does the **max_depth** parameter affect the performance of a decision tree?

kNN - What is true ? (level 1)

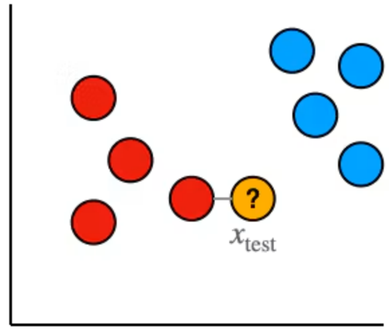

0 ✗	0 ✓	0 ✓	0 ✗
K = 3 : Star is predicted class A	K = 3 : Star is predicted class B	K = 6 : Star is predicted Class A	K = 6 : Star is predicted class B

Menti
0

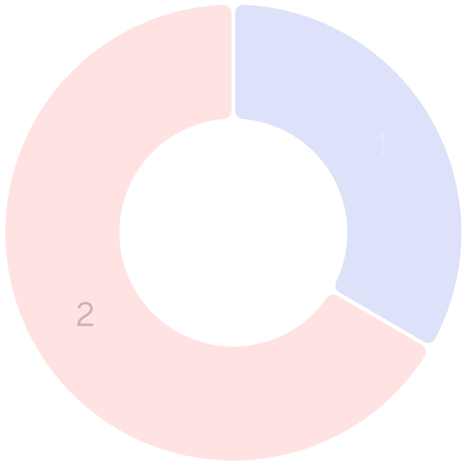

kNN - What is true ? (Level 2)

K = 3 : Predicted blue	✓
K = 3 : Predicted red	×

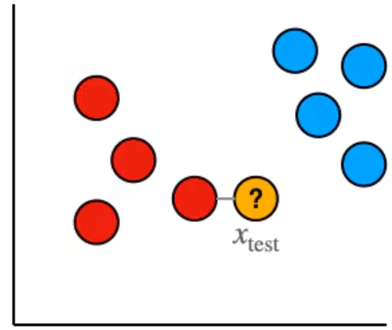

Menti
0

kNN - What is true ? (Level 3)

1	K = 8 : Predicted blue	×
2	K = 8 : Predicted red	×

3/3
